Data Operations Analyst

Experience

Career Pause (Planned Travel)

September 2025 - December 2025

• I took a planned career break following my role at Coca-Cola Consolidated to travel internationally and reassess long-term career direction.

Coca Cola Consolidated — BI Developer II

June 2023 - August 2025

- Owned Tableau user and group alignment with Azure AD, using Python to support secure access for enterprise analytics users.
- Troubleshot ETL pipelines for data extraction and data management within Snowflake.
- Developed Streamlit web apps with Python for user-friendly data interaction and input.
- Utilized stored procedures with scheduled tasks in Snowflake to optimize data run times.
- Supported Revenue Growth initiatives by delivering KPI, profitability, and pricing analyses used in margin and pricing decision-making across business teams.
- Partnered with Warehouse and supply chain teams to track logistics metrics and operational performance through SQL-based reporting and dashboards.
- Compiled data across tables into performant SQL queries supporting dashboard development.
- Leveraged Tableau, PBI, and Sigma for advanced data visualization.

Evolved Buildings — Data Analyst (Volunteer)

January 2023 - May 2023

• Analyzed equipment surveys for mid-Atlantic construction projects using SQL and Excel to identify outdated components for energy-efficient replacements.

Latantha Cafe — Owner / BI Analyst

January 2020 - December 2022

- Founded Latantha cafe and applied data analytics to boost profits by eliminating underperforming items and strategically investing in top-performing assets.
- Achieved net profit margins of 65-70% within the first year of operation.
- Upon departure, Latantha was generating over \$80,000 in annual revenue and ranked among the top three coffee shops in the city, despite prolonged quarantine protocols.

Education

University of Southern Mississippi — Business Administration

August 2009 - June 2013

Received a Bachelors of Science in Business Administration

Google Professional Data Analytics Certification

May 2022 - July 2022

Studied essential data analysis processes and tools such as SQL, Tableau, etc.

Zero to Mastery Bootcamp—Data Science and ML

February 2023 - August 2023

Developing expertise in constructing regression and classification models, with hands-on experience in EDA, data cleansing/splitting, training/testing loops, hyperparameter tuning, evaluation metrics, and model deployment.
